EDUCATION

Cornell University

Ithaca, NY

- College of Engineering: BS in Operations Research and Information Engineering
- Relevant Coursework: Data Structures, Data Science, Operations Research, ML, Object Oriented Programming
- Cumulative GPA: 4.0

2024 - 2028

Horace Mann School

Bronx, NY

- ACT: 35

2020 - 2024

PROFESSIONAL EXPERIENCE

STEM Next Opportunity Fund

May 2026 - Present

Data Science Intern

- Analyzing public data in SQL and Python to surface actionable insights into national trends for stakeholders
- Visualizing data through Tableau dashboards to contextualize organization work against national trends
- Automating and documenting data pipelines to ensure the sustainability of the dashboard upon completion

DUMPS (YC 2020)

June 2024 - August 2024

Product Research Intern

- Monitored growth metrics and evaluated successful initiatives to inform future product development
- Conducted 8 user interviews to gather insights, which were used to pitch and develop 3 new app features
- Analyzed user behavior trends to identify growth opportunities and inform audience targeting strategies

EXTRACURRICULAR EXPERIENCE

Anabel's Grocery

May 2026 - Present

Operations Committee Coordinator

- Overseeing store operations such as scheduling, maintenance, and team training to ensure staff productivity
- Increased data collection accuracy by over 25% and raised staff confidence and satisfaction to over 95%

Cornell Engineering

January 2026 - May 2026

ML Researcher

- Built an LLM prompting workflow to score 190+ third-party privacy policies for the Cornell Library System
- Increased LLM accuracy by 50% by experimenting with input size, temperature, and multi-agent workflows

Cornell App Development

February 2025 - May 2026

Marketing Subteam Lead & Product Marketer

- Grew subteam productivity and satisfaction by leading the marketing team across campaigns and launches
- Drove audience growth through social media and cross-functional marketing across the full product lifecycle

PROJECTS

Birdal (Xcode, Swift)

Mobile app that allows users to document and share bird sightings with friends by sketching in a virtual journal

Hungarian Algorithm Simulator (HTML, CSS, JS)

Interactive website to help students practice the Hungarian Algorithm, built while TAing the course ENGR 1101

Cat Flower Game (Unity, C#)

Browser game where you play as a cat and collect flowers, find a cat friend, and deliver the flowers to them

SKILLS & INTERESTS

Activities: Undergraduate Teaching Assistant, Chinese Students Association, Cornell Delta Delta Delta

Skills: Excel, PowerPoint, Python, Java, HTML, CSS, JavaScript, SQL, Tableau, NLP & ML, Data Visualization

Interests: Music (*guitarist in a student band*), Rock Climbing, Hiking, Art History, Soccer, Baking
